

3P Avenue Bollards

The Avenue Bollard features a triangular base shape and a convex top. The bollard tapers towards the middle providing a modern curved look. There is also a night reflector option available.

3P Technology offers the best of both worlds, combining strength and versatility. The unique and innovative system provides a quality, sturdy bollard while allowing it to be quickly and easily removed. This is ideal to accommodate temporary traffic changes or to create more space when needed.

Quality & durability
