

3P Protector LED Illuminated Bollards

Cylindrical cast-aluminium lighting bollard – A leader when it comes to an illuminated bollard with low power consumption. Minimises risk of electric shock due to low 24V voltage. Significantly lower electricity usage thanks to LED and longer life than conventional lights.

Part of a range

3P Technology offers the best of both worlds, combining strength and versatility. The unique and innovative system provides a quality, sturdy bollard while allowing it to be quickly and easily removed. This is ideal to accommodate temporary traffic changes or to create more space when needed.
