

Wheel Stop

Our Wheel Stops are designed to deliver a simple, durable solution for managing vehicle positioning and protecting surrounding infrastructure. Built for strength and longevity, they help prevent overrun into pedestrian areas, landscaping, and buildings while improving safety and organisation in car parks.

Customisation
available

Quality & durability

- High-strength, durable construction for long-term performance
- Designed to withstand repeated vehicle contact and outdoor exposure
- Defines parking limits and prevents vehicle overrun
- Suitable for fixing to concrete or asphalt surfaces
- Low maintenance, weather and wear resistance
- Lightweight design for ease of transport and installation

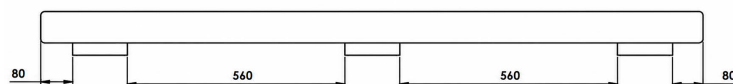

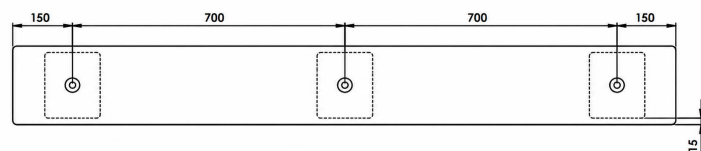

Ideal for

- Car parks
- Commercial sites
- Schools
- Public spaces
- Industrial environments

Finishes available

- Custom sizes and material finishes
